

COP//cink

Since 1987, quality, longevity, and sustainability have been at the heart of Copic's philosophy. From the very beginning, every marker was designed to be refillable — a choice that, thanks to our dedicated users, has helped reduce plastic waste worldwide for decades. Today, we continue that mission with the next generation of Copic Ink. Its redesigned bottle offers clean, precise refills with ease, while the long, tapered nozzle doubles as a tool for fluid ink art. A thoughtful evolution — created to inspire, and built with sustainability in mind.

Copic marker's essential companion

Each bottle is expertly formulated to match all 358 Copic colors, ensuring perfect consistency and effortless refills. Reliable, economical, and brilliantly saturated — it's the heart of your Copic experience.

Copic Ink is water-free and quick-drying and can be used for fluid ink art, airbrush work or classic sketching.

- available solo
- multiple refills for every Copic marker
- alcohol based
- low odor
- 358 colors

One bottle, many creations

Each Copic Ink bottle holds 12 ml of vibrant dye-based ink — enough to refill your favourite markers multiple times: up to 9 Ciao, 7 Sketch, 5 Classic or 3 Wide refills per bottle.

Whether you're topping up a single shade or keeping your full set fresh, Copic Ink makes it easy, economical, and sustainable. More ink, less waste, and more time doing what you love: creating.

Quick, clean and easy refills

Refilling is fast, clean, and intuitive — thanks to the elongated nozzle that delivers ink directly into the marker's reservoir with precision and control.

1. Uncap both ends of the marker to allow the ink to fully penetrate the inner cotton reservoir

2. Use the tweezer tool to carefully remove the broad nib

4. Once completed, reinsert the nib and the cap and store the marker horizontally

3. Insert the nozzle and squeeze gently. Avoid overfilling to prevent ink drips

The recommended amounts are:
Ciao: 1.4 ml, Sketch: 1.8 ml, Classic: 2.5 ml, Wide: 3.5 ml.*
*Refill volume is lower than the ink in a new marker to prevent overfilling.

Color precision

All 358 Copic marker colors have a perfectly matching ink refill.

You can also mix custom colors using an empty refill bottle, giving you the freedom to fine-tune shades to your exact needs. This feature is perfect for artists who want to enjoy exploring unique, personalized color palettes.
